

## **HOUSTON FORENSIC SCIENCE CENTER INTERNSHIPS**

The Houston Forensic Science Center (HFSC) provides unpaid, academically oriented internships for college students with career aspirations in the forensic sciences or in other professional business functions that support the operation. Interns will gain experience and training by working in an HFSC discipline of business operation for 20 or more hours each week for a minimum of two months. HFSC internships offer an opportunity to work in a large, full-service forensic laboratory, allowing participants to explore career options, gain knowledge and skills that complement their academic studies, build resumes and network in a professional environment. Interns will not perform independent casework on evidence.

**The Houston Forensic Science Center is no longer  
accepting internship applications for 2017.**

**Please check the HFSC website in January 2018 for  
summer internship opportunities.**
